Data Center Continuous Power ¹

'Data Center Continuous Power (DCCP) rating is designed and developed specific to a Data Center application where a reliable utility power is available. DCCP offers continuous maximum power for variable or continuous electrical load with unlimited run hours. This product complies with Tier III and Tier IV requirement of Uptime Institute. Ratings are in accordance with ISO 8528-1, ISO 3046-1 and BS 5514. The average load factor is $\leq 100\%$.

Engine capacity does matter ⁴

Engine capacity (cc) plays a vital role in Genset performance. Higher engine capacity leads to a robust and stable Genset performance.

Higher engine capacity also enables the Genset to respond quickly & positively to sudden load additions.

Genset Monitoring at Your Finger Tips

Kirloskar gensets are enabled with Kirloskar remote monitoring system which shares Real Time Genset information and location Services. It can be accessed via mobile device or desktop. Kirloskar remote monitoring system also highlights any parameter which needs special attention. These critical indication alerts are sent to user mobile via text message. It also alerts nearest services dealer in case of any emergency break-down.
